Introduction

This document is the property of the Michigan Department of Community Health (MDCH). The information contained in this document is for the use of Trading Partners engaging in electronic data interchange (EDI) health care transactions with the State of Michigan's Community Health Automated Medicaid Payment System (CHAMPS).

This document is intended as a companion to the 005010X220 • 834 Benefit Enrollment And Maintenance Technical Report 3 (TR3) dated August 2006. It also includes the changes to be found in the following TR3 Errata documents:

- Errata 005010X220E1 • 834 Benefit Enrollment And Maintenance TR3 dated January 2009
- Errata 005010X220A1 • 834 Benefit Enrollment And Maintenance TR3 dated June 2010

The TR3 documents replace the 4010A1 Implementation Guide and related Addenda. The 5010A1 TR3 and related Errata documents can be downloaded from the Washington Publishing Company web site at http://www.wpc-edi.com/content/view/817/1.

This document is expected to be used in conjunction with the TR3 and related Errata for the 834 transaction set. The content of this document follows the guidelines authorized in the version modifications to the Health Insurance Portability and Accountability Act (HIPAA) Final Rule transaction standards published in the Federal Register January 16, 2009.

This document provides MDCH-specific instructions regarding certain elements within the TR3 but does not change, supersede, or add to the definitions, data conditions, or use of data elements or segments in the standard. This document provides MDCH rules regarding:

- Identifiers to use when a national standard has not been adopted
- Parameters in the TR3 and related Errata that provide options

In order to successfully download HIPAA transactions from the CHAMPS system it is necessary to comply with the information contained in the MDCH Electronic Submission Manual Dated February 2009. Note that revision of the MDCH Electronic Submission Manual is expected during calendar year 2011. The most current version of this manual can be downloaded from the MDCH web site at the following location: http://www.michigan.gov/mdch/0,1607,7-132-2945_42542_42545_42638---,00.html.

Transaction Description

The 834 is used to transfer enrollment information from the sponsor of the insurance coverage, benefits, or policy to a payer. Information transmitted includes initial enrollment and subsequent maintenance of individuals who are enrolled in CHAMPS.

Download Notes for ANSI ASC X12 834 Benefit Enrollment and Maintenance

The 834 transaction can be downloaded from the Data Exchange Gateway (DEG) in two formats, either ASCII or binary formats. When downloading to ASCII, files will include line feeds. These control characters will appear after each segment, and will function as carriage returns. However, downloading to binary eliminates the use of line feeds. Please refer to the MDCH Electronic Submission Manual for information regarding:

- Interaction with the MDCH's Data Exchange Gateway (DEG)
- Modes of retrieval (ASCII and binary formats) including Line Feed information

This document includes clarifications for the following information:

- Interchange control header and trailer
- Functional group header and trailer
- 834 transaction set header and trailer
- Detail segments and elements of the 834 transaction itself

The interchange control header and trailer (ISA and ISE) are presented together in the first section of this document. The functional group header and trailer (GS and GE) are presented together in the second section of this document. The 834 transaction set header and trailer (ST and SE) are presented with the detail 834 segments and elements in the third section. Three appendices follow the detailed data clarifications; they contain crosswalks of elements cited in the data clarification comments.

Supporting Appendices:

- Appendix A: Crosswalk for Medicare Plan Code (2000 INS06)
- Appendix B: Crosswalk for Race or Ethnicity Code (2100A DMG05)
- Appendix C: County Codes (2100A N4 N406 Location Identifier)

This document uses several text conventions to distinguish MDCH data elements from the TR3 data elements. The following table lists the text conventions used in this document.

Convention used	Explanation
< >	Text included within < > describes what will be transmitted by MDCH. This could be the MDCH data element name or value, or, if blank, will display <spaces>.
" "	Text with " " around a value represents HIPAA TR3 values.
( )	The HIPAA TR3 description of the value in quotes, described above, is provided parenthetically.
